a new york times bestseller maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful wall street journal throughout history maps have been fundamental in shaping our view of the world and our place in it but far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places mapmakers do not simply represent the world they construct it out of the ideas of their age in this scintillating book jerry brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today he vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it

although the way we map our surroundings is more precise than ever before brotton argues that maps today are no more definitive or objective than they have ever been readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again a fascinating and panoramic new history of the cartographer s art the guardian the intellectual background to these images is conveyed with beguiling erudition there is nothing more subversive than a map the spectator a mesmerizing and beautifully illustrated book the telegraph

a history of the development of world maps during the later medieval period in the centuries leading up to columbus s journey in the two centuries before columbus mapmaking was transformed the world map 1300 1492 investigates this important transitional period of mapmaking beginning with a 1436 atlas of ten maps produced by venetian andrea bianco evelyn edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps she finds that both the makers and users of maps struggled with changes brought about by technological innovation the compass quadrant and astrolabe rediscovery of classical mapmaking approaches and increased travel to reconcile the tensions between the conservative and progressive worldviews mapmakers used a careful blend of the old and the new to depict a world that was changing and growing before their eyes this engaging and informative study reveals how the ingenuity creativity and adaptability of these craftsmen helped pave the way for an age of discovery a comprehensive and complex picture of the changing face of medieval geography with the mastery of a formidable palette of historiographic knowledge and well reasoned discussions of the sources the world map 1300 1492 will certainly remain an important work to consult for both medieval and early modern scholars for many years to come ian j aebel *terrae incognitae*

an ancient chinese proverb suggests they are wise parents who give their children roots and wings and a map maps that

changed the world features some of the world's most famous maps stretching back to a time when cartography was in its infancy and the edge of the world was a barrier to exploration the book includes details of how the lewis and clark expedition helped map the american west and how the british mapped india and australia included are the beautifully engraved dutch maps of the 16th century the sinister utopian maps of the nazis the maps that presaged brilliant military campaigns charted the geology of a nation and the ones that divided a continent up between its european conquerors organised by theme the book shows the evolution of map making from all corners of the globe from ancient clay maps to cartographic breakthroughs such as harry beck's map of the london underground there are also famous fictional maps including the maps of the lost continent of atlantis and tolkien's middle earth with an introduction written by acclaimed cartographic historian jeremy black
